PROFILE

A passionate back-end developer with 3+ years of experience in Python and Django. Specialized in RESTful API design, database optimization, and developing automation tools such as Telegram bots. Currently seeking opportunities to contribute to scalable and efficient systems.

PROJECTS

Store API with DRF 🔗

RESTful API for an online store with product management, cart system, and token-based authentication. Tech: Django, DRF, PostgreSQL

Exchange System 🔗

A cryptocurrency exchange project using external data integration, storing real-time price data in MongoDB and user data in PostgreSQL.

Food Menu Selection System 🔗

A Django Rest Framework project for weekly food menu management, where admins define menus and users select meals.

Resume Website 🔗

A personal resume built with HTML/CSS and hosted on GitHub. Structured for professional online presentation and portfolio sharing.

Image to Text & Translate

A tool that extracts text from images using Tesseract OCR, with automatic language detection and optional translation functionality.

PROFESSIONAL EXPERIENCE

Parnian Co

Back-end Developer

09/2024 – present | Tehran, Iran

- Worked with different teams to build back-end systems and connect them with front-end parts.
- Built tools to automate daily office tasks and reduce manual work.
- Helped create a system for reservations and managing content more easily.
- Used Git for version control and Docker to run apps in separate environments.
- Took part in team meetings using Agile to plan and finish tasks better.
- Developed admin panels to manage content, tags, groups, and ads more easily.
